

Adjudication Fee Schedule

PURPOSE -If the volume cannot be calculated the fee will be \$20 per water right	VOLUME in acre-feet per year	FEE per water right	FEE CAP
COMMERCIAL Where water has no stated volume, the volume will be calculated based on: flow rate x number of days in period of use = acre-feet per year volume.	0-100	\$20	fee capped at 20 water rights for each row under volume
	>100-5000	\$1,000	
	>5000	\$2,000	
INDUSTRIAL Where water has no stated volume, the volume will be calculated based on: flow rate x number of days in period of use = acre-feet-per year volume.	0-1000	\$20	fee capped at 20 water rights for each row under volume
	>1000-4000	\$1,000	
	>4000	\$2,000	
MINING Where water has no stated volume, the volume will be calculated based on: flow rate x number of days in period of use = acre-feet per year volume.	0-1000	\$20	fee capped at 20 water rights for each row under volume
	>1000-4000	\$1,000	
	>4000	\$2,000	fee capped at 20 water rights for each row under volume
MUNICIPAL Where water has no stated volume, the volume will be calculated based on: flow rate x number of days in period of use = acre-feet per year volume.	0-1000	\$20	
	>1000-4000	\$1,000	fee capped at 20 water rights for each row under volume
	>4000	\$2,000	
POWER GENERATION Where water has no stated volume, the volume will be calculated based on: flow rate x number of days in period of use = acre-feet per year volume.	0-100,000	\$20	fee capped at 20 water rights for each row under volume
	>100,000-1MILLION	\$1,000	
	>1 MILLION	\$2,000	
INSTREAM FLOW NON-IRRIGATION/OTHER USES Where water has no stated volume, the volume will be calculated based on: flow rate x number of days in period of use = acre-feet per year volume.	0-50,000	\$20	NO FEE CAP fee required for each water right
	>50,000-1 MILLION	\$1,000	
	> 1 MILLION	\$2,000	
GROUPS ALLOCATING IRRIGATION WATER (Irrigation Districts, Water Users Association, etc.*	Per User Not Per Volume	\$20	fee capped @ 40 users or \$800
ALL OTHER WATER RIGHTS NOT INCLUDED IN THE ABOVE CATEGORIES (ie. Stock, Domestic, Private Irrigation)	Per Water Right Not Per Volume	\$20	fee capped @ 20 water rights or \$400

* The fee for an irrigation water right or irrigation claim that is part of an irrigation district, ditch company, canal company, irrigation project, water user's association, or other organized group allocating irrigation water is \$20 a user, with the fee capped at 40 users. The fee to a group user will be capped at 40 users or \$800 and must be split equally among the users. The group will receive the water adjudication bill and will be responsible for billing and collecting payment from its users.

FEE EXAMPLE: A claimant with 15 mining water rights claims @ 0-1000 acre-feet, 25 mining water rights claims @ >1000-4000 acre-feet and 2 mining water rights claims @ >4000 acre-feet would pay a total of \$24,300.

$$15 \text{ water rights} \times \$20 = \$300$$

25 water rights will be capped at 20 water rights :

$$20 \text{ water rights} \times \$1000 = \$20,000$$

$$2 \text{ water rights} \times \$2000 = \$4,000$$

TOTAL for all mining water rights claims in the example = \$24,300
